

Ken Chiu

2530 Rivera Street, San Francisco, CA, 94116 | (415) 613-3879 | kenchiu@berkeley.edu | github.com/KenChiu100

Education:

University of California, Berkeley. Berkeley, CA

Expected May 2018

- Bachelor of Arts: Cognitive Science; emphasis in Computational Modeling
- Minor: Computer Science

Technology Highlights:

Programming/ Languages: Swift C Python Java MYSQL HTML CSS JavaScript
Ruby on Rails Learning React Native

Skills: XCode Atom Eclipse Vim MongoDB Robomongo Restful API
JSON APIs Ajax Bootstrap jQuery Git Pivotal Tracker Linus/Unix
Mac OSX Windows TDD BDD Unit testing Agile

Projects:

Enrollme (web app) <https://damp-cove-57929.herokuapp.com/>

July 2017 – August 2017

- Improved and refactored a web app from legacy code using Ruby on Rails based on client's requests.
- Enrollme provides a platform for UC Berkeley students to connect each other and form teams in the CS169 class. It also provides administration features for Instructors to manage teams.
- I worked on this project along with five other teammates. We cooperated by using Pivotal Tracker and GitHub. We practiced **Agile** software development while developing Enrollme. We improved the app from forming teams in a static way to forming teams in an interactive way with team matching feature.

Personal Portfolio (website) <https://kenchiu100.github.io/>

June 2017 – Present

- Created my website using HTML, CSS, JavaScript, Bootstrap, and GitHub Pages.
- It handles user events such as clicks and scrolls, and supports responsive web design based on the characteristics of the device used (desktop, tablet, mobile phone).
- Displaying my resume, past projects, contacts, and my achievements.

Chat (Python)

September 2016 – October 2016

- Built an application in Python that allows users to connect and chat on different channels over a network.
- Utilized non-blocking sockets for client and server to receive data from multiple sources, in an unknown order.

Tesdrop (iOS app) www.tesdrop.com

April 2016 – July 2017

- Built a unique and user-friendly iOS app, Tesdrop, using XCode in Swift, AWS EC2, and MongoDB.
- It provides an easy way for students to share past exams so that they can maximize their resources and study smart.
- I worked on this iOS app along with two teammates. We cooperated by using GitHub.

Math SF (website) www.mathsf.com

December 2013 – Present

- Designed, built, and updated the website Math SF using WordPress.
- Math SF is a non-profit educational website. We provide math tutorials in self-recorded videos and practice tests based on CCSF's math syllabus.

Experience:

CodePath iOS BootCamp. San Francisco, CA

January 2016 – April 2016

- Successfully completed an accelerated training in iOS Swift app Development.
- Learned how to build an iOS app from scratch

Math Tutor & Clerk. CCSF Math Lab. San Francisco, CA

August 2013 – May 2016

- Tutored students in Math; evaluated learning styles of individual student and effectively adjusted tutoring style based on results.
- Acknowledged by the Math Lab Coordinator for strong commitment to student success.
- Worked 15 hours per week while being as a full time student with good time management.

Volunteer, Computer helper. Portola Branch Public Branch Library. San Francisco, CA September 2015 – October 2015

- Provided patient support to Chinese immigrants engaged in basic and intermediate Internet and general computer activities.
